## Interim Statistics of 2016/17 Interview Candidates (MED 2021)

Qualified applicants received an academic file review which included: review of prerequisites, calculation of the overall average (OGPA), derived from all university-level transferrable courses and the removal, when applicable, of the lowest academic year to give an adjusted academic average (AGPA). An academic score (AQ) out of 50 was generated from either the OGPA or a valid AGPA score.

The non-academic file review (NAQ) score, also out of 50, was derived from an evaluation of the extra-curricular activities (including awards, research and publications, where applicable) and employment history listed by applicants.

The results of the academic and non-academic file review were combined to generate a pre-interview total file review (TFR) score out of 100. Both the academic and non-academic scores were standardized against the current applicant pool.

### British Columbia Applicants (BC)

File reviews were completed for **1331** applicants who were identified as BC residents. A total of 579 BC residents who achieved a total file review score of **52.91/100** or more were invited to interview.

### Out-of-Province Applicants (OOP)

Academic and non-academic file reviews were completed for **693** out-of-province applicants. A total of 81 OOP candidates who achieved a total file review score of **63.16/100** or more were invited to interview.
